

Finding Articles of a Statistical or Scientific Study

- From the library home page <http://www.tcc.edu/lrc/index.htm> navigation panel click on the Subject list of databases. You will find many databases of articles to choose from.
- Select a database related to your general topic or choose one of the favorites.
- Type your subject in the keyword search option with one or two of the following words:

Statistics
Chart
Research
Methods
Sample

Study
Table(s)
Graph
Data or Tabular Data
Figures

Trends
Survey
Confidence Interval
Demographic
Projections

- Search examples:

medical care and statistics and sample
education and sample and methods
gene therapy and research and results
black holes and data and projections
employment and women and study

- In most databases you can limit your initial search or your results to full-text and/or peer review. Peer review, also known as refereed, means the article has been reviewed by experts in the field before publication.
- Also, use our subject guide on Statistics <http://www.tcc.edu/lrc/guides/stats.htm>
