

# ARTS AND DESIGN TECHNOLOGY

Programs in Arts and Design provide the skills necessary to enter the fields of fine arts, crafts, photography, interior design, computer graphics, multimedia, and graphic design. They consist of skills-oriented or studio specialization classes teaching professional practices and employing current and traditional technologies. Most programs include portfolio preparation for the job search or application to upper-level institutions.

To meet minimum performance requirements in studio art courses, students must demonstrate visual acuity, manual dexterity (fine motor control), and the capacity to understand and follow instructions.

In studio arts no prior training or experience is needed. Students who do have prior experience and/or a portfolio are encouraged to inquire about advanced placement and experiential course credit.

In graphic design, studio specialization courses teach professional practices and standards using current technology. Students will prepare portfolios for job search and/or application to upper-level institutions.

Art, crafts, and photography courses are taught at the Visual Arts Center, TCC at Olde Towne. Interior Design courses are taught at the Chesapeake Campus.

## STUDIO ARTS

The Studio Arts curriculum is designed to provide students with extensive studio experience in a variety of media, tools, and working methodologies; to establish within them a solid basis for critical thinking, discernment, and discrimination in the visual arts; to give them sufficient knowledge of art history as a foundation to visual literacy; to encourage them in the continuing investigation of contemporary trends in the studio arts as revealed through actual production and critical treatises; and to provide them with a background in general education that will complement and balance the studio concentration.

## STUDIO ARTS

### CRAFTS

The Associate of Applied Arts degree in Studio Arts with a specialization in Crafts is a skills-oriented program with instruction in Pottery and Glass Blowing using traditional and current technology. Students will prepare portfolios to transfer to a four-year degree program and/or begin careers in the crafts industry.

Positions include practicing crafts person, commercial framing or art supply service representative, gallery representative, instructors or assistant instructors at art centers or galleries.

# GRAPHIC DESIGN

## MULTIMEDIA

The specialization in multimedia is designed to meet a growing employment need in the area of graphic design in Hampton Roads and to enhance the college's program in Graphic Design. The emphasis of the specialization is on Web design and video animation production skills. The knowledge and skills provided in this program prepares graduates for entry into the multimedia industry.

**INTERIOR DESIGN**

The career studies program in Interior Design provides a basic foundation in visual presentation skills, spatial design, color coordination, the evolution of furniture and interior styles, and estimation. All courses count toward the associate's degree. The Associate of Applied Science (AAS) degree adds general education courses to the basic career studies courses. Students can customize the program with their choice of interior design electives.

The career studies program prepares students for employment as a color consultant or sales associate in retail interior design. Graduates with the AAS degree find positions in visual merchandising, floor coverings, decorative accessories, and home furnishings. They work for architectural firms, commercial designers, retailers, or open their own design firms.
