470 Clock Hours

The leaders in an organization often set the tone and establish the benchmarks for success. The IT Management with CompTIA Network+/Server+ Training Certificate provides proficiency in configuring and operating a variety of industry-standard network products. In this program, the focus is on developing a successful leadership style that facilitates team-building, collaboration, and a corporate culture that promotes success. It includes training on new technologies such as wireless networking and gigabit Ethernet. The Server+ designation is offered by CompTIA designation (vendor-neutral) for technicians who are responsible for hardware functionality of computers at a level that is more sophisticated than entry-level. This online training program is particularly well suited for anyone in IT who has recently assumed management responsibilities, anyone who is managing IT professionals, or anyone who needs a basic and introductory perspective on some of the unique issues facing the management of IT professionals. Different decision-making techniques will also be explored in the context of successful leadership styles.
