One year program  
510 Clock Hours

The leaders in an organization often set the tone and establish the benchmarks for success. The IT Management with CompTIA Security+ Training Certificate covers IT industry-wide security topics, including communication security, infrastructure security, cryptography, access control, authentication, external attack, and operational and organization security. In this program, the focus is on developing a successful leadership style that facilitates team-building, collaboration, and a corporate culture that promotes success in an IT environment. Other topics included in this course are protocols used in Linux, UNIX, and Windows 2000 in addition to the TCP/IP suite component protocols, and Ethernet operations.

This online training program is particularly well suited for anyone in IT who has recently assumed management responsibilities, anyone who is managing IT professionals, or anyone who needs a basic and introductory perspective on some of the unique issues facing the management of IT professionals. Our students will also gain knowledge in capturing, analyzing, and generating IP traffic, how to exploit protocol weaknesses and examine defensive solutions. Packet filtering, password policies, and file integrity checking are also covered along with different decision- making techniques.
