Notes
1. This map was developed by H2R Engineering Inc. using readily available information and is not based on a field survey. Information shown is approximate.
2. The campus MS4 has no outfalls to surface waters within the regulated area. Approximate points of interconnection (POI) with the City’s MS4 are shown. Additional POIs may exist underground from roof drains and yard inlets.
Approximate campus property boundary and MS4 Regulated Area

Notes
1. This map was developed by H2R Engineering Inc. using readily available information and is not based on a field survey. Information shown is approximate.

2. The campus MS4 has no outfalls to surface waters within the regulated area. Interconnections with the City's MS4 are shown. Nearly all runoff from the campus discharges to regional stormwater management facilities off-site and part of the City's MS4. Since the entirety of runoff from the campus ultimately discharges via interconnections, the regulated area is considered the same as the campus property.

Abbreviations
- BMP = Stormwater Facility Best Management Practice
- POI = Point of Interconnection to City MS4

For additional information regarding stormwater facility BMPs, see the TCC BMP Database.
Legend
- Building
- Road
- Storm
- SWM Facility
- Forest / undeveloped
- Flow direction
- Storm sewer
- Storm channel
- Storm structure

Abbreviations
- BMP = Stormwater Facility Best Management Practice
- OF = MS4 Outfall
- POI = Point of interconnection with City MS4

For additional information regarding stormwater facility BMPs, see the TCC BMP Database.
